Lessons Learned Report

Project Name :   **Automated College Timetable Generator**
Project Manager: **Yasel Taneo**
Project Dates: **November 12, 2019 - March 9, 2020**
Final Budget: **₱ 25,377.89**

1. Did the project meet scope, time and cost goal?
   Yes, we met the scope, time and cost goal.

2. What were the success criteria listed in the project scope?
   Below is what we put in our project scope statement. The project should pay for itself within 5 months of completion. This project allocated ₱ 25,337.89. We must also develop a method for capturing the benefits while the automated college timetable generator is being developed and tested. If the project takes a little longer to complete or cost a little more than planned, we will still view it as a success if it has a good payback and helps us to promote our system image as an excellent project.

3. Reflect on whether you met the success criteria.
   As stated above if the project takes a little longer to complete or costs a little more than planned we will still view it as a success with good feedback from the client. Making a project is not really easy especially if you only have limited time to make it, but still whatever the result is we're confident enough to claim our success in this project.

4. In terms of managing the project, what were the main lessons your team learned from this project?
   In managing the project we learned how to manage our time, how to be a keen observer in every decision we make and always ask your team if there are some things that are not clear to you so we can avoid misunderstanding while doing the project.

5. Describe one example of what went right in this project.
   What went right in this project was, we were able to finish this project and we consider this as an accomplishment in our team.

6. Describe what went wrong in this project.
   What went wrong in this project was the delayed submission in assigned tasks but not always and also because of some confusion and problems encountered during the process.

7. What will you do differently on the next project based on your experience working on this project?

We believe that strong commitment and constant communication while doing a project is a must, asking some ideas from your team to get their opinion for a successful project in the future.
